Exam : **LOT-981**

Title : IBM Lotus Notes Domino 8.5 Building the Infrastructure

Version : Demo

1. The Domino Console connects to the Controller over what default port?

A.80

B.1352

C.1533

D.2055

Answer: D

2. Event handlers contain numerous notification methods. Which of the following is NOT a supported notification method?

A.Pager

B.Broadcast

C.Outbound phone call

D.Log to Windows NT Event Viewer

Answer: C

3. Karen, the Domino administrator, is configuring client authentication through Directory Assistance. She wishes to restrict lookups to a specific directory to ONLY users in the Europe/WXYZ hierarchy. Which of the following represents the proper trusted rule to be created in Directory Assistance?

A./ / / /WXYZ/*

B./ / /Europe/WXYZ/*

C./ / */Europe/WXYZ/*

D.*/*/*/Europe/WXYZ/*

Answer: B

4. The Cluster Database Directory Manager creates which of the following databases?

A.CLDBDIR.NSF

B.CLUSTERDB.NSF

C.CLUDIRMGR.NSF

D.CLUDIRECTORY.NSF

Answer: A

5. Domino Domain Monitoring (DDM) enhanced events contains which of the following?

A.Specific target information only

B.Events generated by an event probe only

C.Events generated by an event generator only

D.All of the above

Answer: D

6. When an S/MIME signed message has a disclaimer added by the server and is received by a Notes user, which of the following is the result?

A.The signature cannot be verified

B.The signature is stripped from the message

C.The message cannot be read by the recipient

D.The message cannot be transmitted and is returned to the user

Answer: A

7. You are configuring Directory Assistance to utilize replicas of databases across numerous servers. However, you wish for the first lookup to be done locally for a replica. What should be placed in the Server Name field of the Directory Assistance document?

A.*

B.Local

C.Notes

D.Primary

Answer: A

8. Marcus, the Domino administrator, wishes to modify the reverse path setting on forwarded messages sent by user mail rules. Which of the following settings would allow the message to possibly bypass spam filters while not providing a valid email address?

A.Set reverse-path to null

B.Preserve existing value

C.Use recipient Internet address

D.Construct nondeliverable return address

Answer: D

9. The previous internal Domino time is saved in Last_Domino_Time when the Domino server shuts down, when the server is successfully restarted and when the OS time refreshes the internal Domino time. Which of the following prevents Domino from starting if the time change has moved beyond a preset range?

A.Rematch_OS_Time

B.Reset_Actual_Time

C.Restart_Time_Action

D.Restart_Time_Interval

Answer: D

10. Which of the following are the default names for the DB2 instance, database and schema?

A.DB2, Domino, Domino

B.NSF, Domino, DomDB2

C.Domino, NSFDB2, NDDB2

D.SYSCTR, Domino, DB2AccServ

Answer: A

11. When calculating the size of a mail file to determine whether it conforms to configured mail quota or warning threshold limits, Domino treats attachments stored using the Domino Attachment and Object Service as which of the following?

A.As though each user does not have a quota

B.As though each user owned the entirety of the attachment file

C.As though each user owns only the size of the message without the attachment

D.as though each user cannot exceed warning threshold limits for their mailfile

Answer: B

12. Users in your organization utilize Lotus Traveler for their mobile devices. They are successfully able to

search for user names and telephone numbers. What is the default amount of returned results in their searches?

A.10

B.25

C.50

D.100

Answer: B

13. Your company has been utilizing the ID vault and regularly marking IDs as inactive when a user leaves the company. In this instance, a user has returned to the company. Which of the following steps represent the best option for this returning user?

A.Choose to restore the id in the vault as active again

B.When registering the user, add the new id to the vault

C.Have the user email their id file back to the vault to reactivate

D.Have the user authenticate via the web interface to activate their old id file

Answer: A

14. In which of the following scenarios would the Notes client push an updated copy of their user id file to the server ID vault?

A.When the user changes home servers

B.When the user adds an Internet certificate

C.When the user changes the logoff timeout on their Notes client

D.When the user accepts a cross certificate to another Notes domain

Answer: B

15. Edison, the Domino Administrator, wants to enforce file security on HTML and Image files. Which one of the following should he do?

A.Enforce ECLs

B.Create File Protection documents

C.Use Protect Directories in the HTTPD.CNF files

D.Domino does not allow security enforcement on HTML and Image files

Answer: B

16. Database1.nsf needs to replicate between two servers.

ServerX should only be able to add and modify information in ServerZ's replica copy of Database1.nsf.

ServerZ should be able to pull new and modified information from ServerX's replica copy of Database1.nsf, but not be able to write new or modified information to ServerX's copy.

Which one of the following represents the access levels each server should have?

A.ServerX should have Author access to Database1.nsf on ServerZ, and ServerZ should have Reader access to Database1.nsf on ServerX

B.ServerX should have Manager access to Database1.nsf on ServerZ, and ServerZ should have Reader access to Database1.nsf on ServerX

C.ServerX should have Editor access to Database1.nsf on ServerZ, and ServerZ should have Reader access to Database1.nsf on ServerX

D.ServerX should have Editor access to Database1.nsf on ServerB, and ServerZ should have Depositor access to DAtabase1.nsf on ServerX

Answer: C

17. Which one of the following database elements is not updated when the DESIGN task is run?

A.Forms

B.Views

C.Roles

D.Agents

Answer: C

18. Which one of the following happens when the purge interval is shorter than the replication interval?

A.The view indexes may not refresh after a replication.

B.The database will force an unscheduled replication to occur.

C.Documents deleted from a replica of the database can reappear.

D.Users may not see the newest documents when they open a database

Answer: D

19. A server was given Editor access to an application. Which one of the following describes how this server fits into the design distribution process for this application?

A.It can send design changes only.

B.It can receive design changes only.

C.It can both send and receive design changes.

D.It can neither send nor receive design changes.

Answer: B

20. Which one of the following server console commands should be utilized to clear the database cache?

A.DBCache Flush

B.DBCache Clear

C.Database Flush

D.Database Clear Cache

Answer: A

21. ServerA/Singapore/Acme is being accessed by both Web and Notes clients:

1. Web clients are in the Web Users group.

2. Notes clients are in the Corporate Users group.

Which one of the following should Hans, a Domino administrator, do to ensure that only Web users access ServerA/Singapore/Acme?

A.Recertify ServerA/Singapore/Acme using a different OU certifier.

B.Change the Access server field in the Server document to remove Corporate Users.

C.Remove all Person documents from the Domino Directory on ServerA/Singapore/Acme.

D.Change the Not access server field in the Server document to remove Corporate Users.

Answer: B

22. Which one of the following statements regarding the Certificate Authority (CA) is true?

A.The CA issues Lotus Notes certificates only.

B.The CA issues Internet certificates only.

C.Access to the certifier ID must be granted.

D.The CA issues both Lotus Notes and Internet certificates.

Answer: D

23. Marilyn wants to view the expired certificates in the Certification Revocation List (CRL). In which one of the following would Marilyn find this information?

A.This information cannot be viewed.

B.In the CRL document in the Domino Directory.

C.In the Certifier document in the Domino Directory.

D.In the Server document in the Domino Directory.

Answer: C

24. Brie left the Create New Replicas field blank on a server document. Who can create new replica databases on that server?

A.No one

B.Administrators

C.LocalDomainServers

D.Everyone in the domain

Answer: A

25. What type of information is stored in an .NSD file?

A.Current server status

B.Notes storage directories

C.Information regarding a system crash

D.HTTP access information for the server

Answer: C

26. Roxana issued the command SET SECURE NOONE at the server console. What did this accomplish?

A.Locked the web console to browser users

B.Prevented anyone from accessing the server console

C.Prevented anyone other than himself from using the console

D.Forced anyone using the console to type in the password NOONE to have access to the console

Answer: D

27. What action does a stop trigger perform?

A.Shuts down a task if a threshhold is reached.

B.Notifies an administrator if an event happens.

C.Pauses the Domino console when a particular event occurs.

D.Automatically restarts the server according to predefined criteria.

Answer: C

28. William wishes to migrate his company's Notes certifier to the new Certificate Authority process. He has chosen to encrypt the certifier id with a lock id. What Domino server console command must be issued next?

A.load unlock ca

B.load ca unlock

C.tell ca activate

D.tell ca unlock

Answer: D

29. Domino Domain Monitoring (DDM) contains how many classes of event information?

A.One

B.Two

C.Three

D.Four

Answer: B

30. Kyle, the Domino administrator, needs to connect to the Domino Controller through a firewall. What

program must be configured properly for this functionality?

A.Binder service

B.Service binder

C.Bind controller

D.Controller binder

Answer: B
